Guzi-West

RECENT PROJECTS

Whiskeytown National Park - Numerous Park buildings were destroyed during the Carr Fire during the summer of 2018. Guzi-West provided hazardous waste sampling, asbestos building material surveys, lead-based paint surveys, and air monitoring during cleanup and debris removal operations.

Carr and Camp Fires - Guzi-West had a team in place that provided everything to homeowners from initial asbestos testing, work plan submittal, oversight of debris and soil removal, to final soil testing and documentation submittals required by local agencies for a clearance to re-build.

Asbestos, Lead-Based Paint, and PCB Surveys – Guzi-West personnel have completed numerous surveys to identify asbestos, lead-based paint, and polychlorinated bi-phenols (PCBs), prior to proposed renovation and demolitions. Following receipt of laboratory results, staff prepare report of findings detailing the presence or absence of the materials, respective quantities, and applicable local, state, and federal regulations.

Bridge Asbestos and Lead Paint Surveys

Guzi-West has conducted numerous bridge surveys for consultants and local agencies regarding the presence of Asbestos Containing Material (ACM) and Lead Paint.

Illegal Marijuana Grow Inspection and Testing

At the request of local County building departments, Guzi-West developed a sampling and laboratory protocol regarding illegal indoor grow sites. These sites may have mold issues due to excessive humidity, along with residual pesticides and herbicides.

BIOGRAPHY

Clay Guzi - Throughout his 20-year career, Mr. Guzi has worked in the fields of hazardous material consulting, project management, and environmental permitting. He is thoroughly familiar with state and federal regulations impacting various projects, and has assisted countless clients with seeing projects through the complex environmental permitting process.

Further, Mr. Guzi has proven to be an expert in breaking down complex permits under numerous regulations, developing respective compliance plans, and ensuring compliance through meticulous follow-up. The entire Guzi-West team is dedicated to our clients and ensuring top quality work is produced for all projects, large or small.
